Summary

Front-End Developer with a background in emergency response and healthcare, blending strong communication and problem-solving skills with hands-on experience in HTML, CSS, JavaScript, and React. Recent graduate of a coding bootcamp with a passion for building responsive, user-friendly web applications. Adept at working collaboratively, optimizing performance, and staying up to date with emerging technologies. During gaps in my formal employment, I focused on self-directed learning, freelance work, and personal development to sharpen my technical skills, explore new tools, and prepare for a career in front-end development.

Technical Skills

Languages & Frameworks: HTML, CSS, JavaScript, Bootstrap, React.js, Python, Next.js (learning)
Web Development: APIs, Responsive Design, SEO, OOP, Data Structures, UI/UX principles
Tools: Git, GitHub, VSCode, Netlify, Chrome DevTools
Other: Microsoft Office Suite, SQL, Data Analysis, CMS basics

Professional Experience

Advanced Emergency Medical Technician / Firefighter
Excelsior Medical / Long County Fire | GA | 2011 – 2017

- Provided emergency care, operated under pressure, and maintained accurate patient documentation.
- Led emergency responses and mentored junior team members as a Fire Lieutenant.

Data Analyst / Admin Assistant
New Breed Logistics – Fort Worth, TX | Jan 2008 – July 2011

- Built reports and MS Access databases to support team and management needs

Education

SheCodes Bootcamp – Junior Front-End Developer Diploma *April 2025*

Completed projects using HTML, CSS, JavaScript, React.js, Python

- Focused on modern web practices, SEO, responsive design, APIs, Git/GitHub

A.A.S. Fire Protection & Safety + A.A.S. Fire Administration
Weatherford College – Weatherford, TX

Additional Highlights

- Excellent under pressure, highly adaptable, and quick to learn new technologies
- Strong collaboration skills and ability to work cross-functionally with design/dev teams
